## **Keeping you safe beyond the Pandemic**

You or your loved one is scheduled for a procedure at our Surgery Center. Even though the pandemic is technically over, we wanted to let you know the safeguards we have in place for your safety. **We do not operate on known Covid-19 patients at our surgery center.**

1. The pre-operative testing RN, will call you and review your medical and surgical history. She will ask if you are vaccinated, and what vaccines you have received.
2. You will see us washing our hands a lot, either with soap and water or alcohol hand sanitizer.
3. Your 'pre and post-op bay' is thoroughly cleaned between each patient following the CDC and EPA guidelines.
4. Your placement in the pre-operative /PACU area is determined by the procedure you are scheduled for, again to make sure you are kept at least 6 feet away from other patients.
5. We terminally clean the surgery center daily with a special EPA approved Corona virucidal agent.
6. Please call if you have any questions or concerns.

**We will communicate with your family in person, via phone or text messages to keep you loved ones informed of your time with us!**
